What was the problem?

# Fishing Tourism

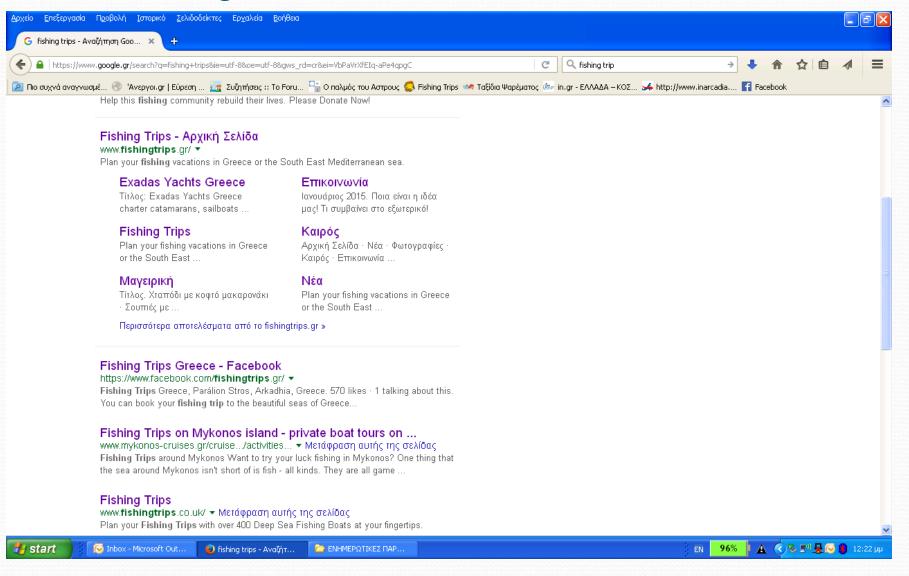

There was no proper law

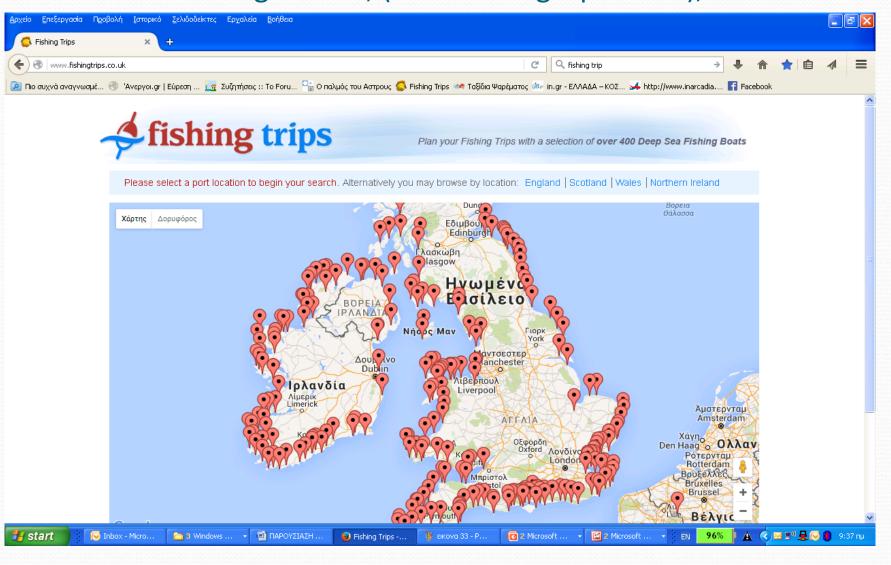

Let's see, what is happening abroad? If we write the words Fishing trip / fishing trips / fishing trips on Google or some other search engine, we get the following results:

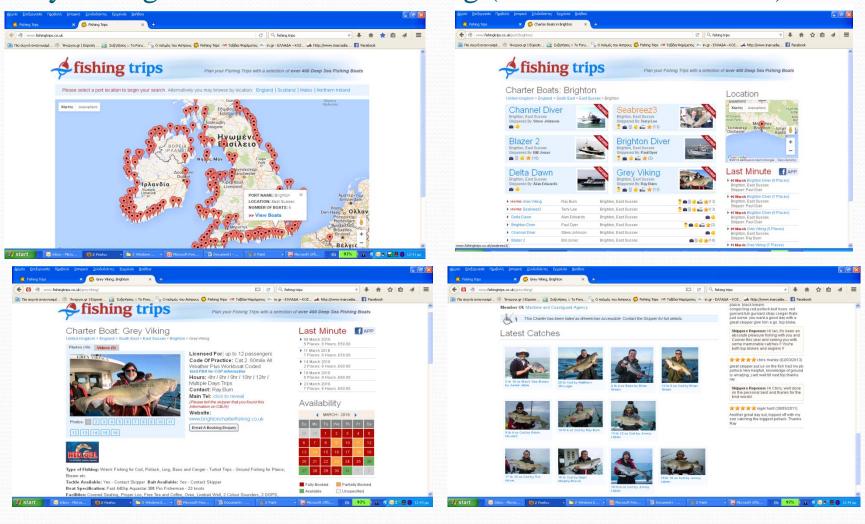

# If we go a little further down the list, we see::

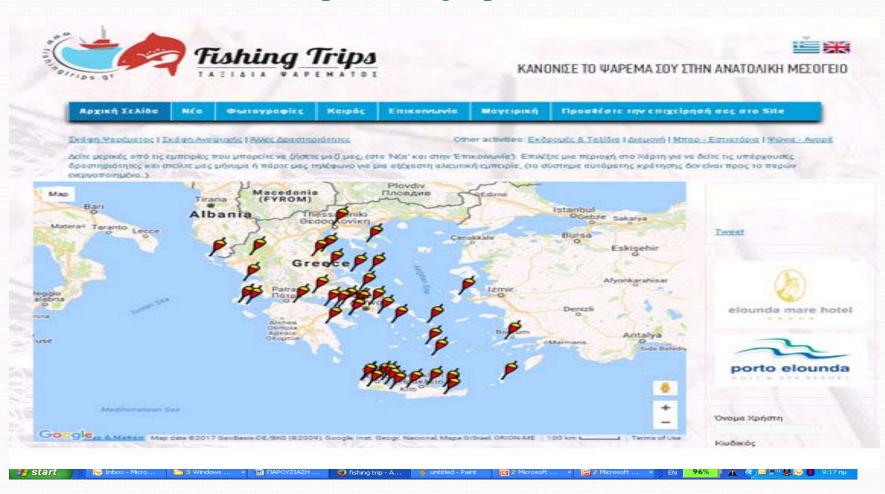

# If we choose the English site, (www.fishingtrips.co.uk), we see:

We choose a place, Brighton, which has 6 boats, we choose a boat, Gray Viking and we close our fishing (the date is available ..).

Our Platform: www.fishingtrips.gr (We go very high on all search engines .. with the words fishing trips, fishingtrips etc.)

We select the fishing boat with the appropriate license and close our fishing, in the place that suits us (www.fishingtrips.gr)

Here are some more pictures of what are happening in different parts of our country, since we have more than 50 professional fishing vessels with a license for fishing tourism, just in the second year of operation, in many areas of our country ...

#### THE BENEFITS OF OUR COUNTRY

- The navy of the Greeks and the largest number of fishing vessels in Europe (more than 15.000).
- The great tradition, from Antiquity to today, in Professional Fishing, as well as in the construction of beautiful Traditional fishing boats.
- The longest coastline in the Mediterranean (more than 16300 km, twice as Italy, three times as Spain), mild climate, popular tourist destinations, etc.

### Our Goals:

• Four hundred and five hundred or more professional fishing boats with a license for fishing tourism as soon as possible in every region of our country and this is projected abroad (where our Tourism, our islands, and our other Agricultural Products go, and Fisheries Tourism).

With the main goal, of becoming our Country, International Fishing Destination.

• Direct participation in the European Fisheries Instruments, with the ultimate goal to be very shortly, to be the European Fisheries Policy, as we have the largest number of fishing vessels in Europe (with participation in European decisions, we can also provide solutions in Greek fishing Problems...).

## Achieving the above objectives may lead to:

- Attracting many additional tourists to our country. Many are the ones who first close their fishing and then their holidays.
- Promoting and other well-known Agricultural Products along with Fishing Tourism (already in many areas, ending fishing, tourists take traditional products or try them on board, for example, oil, feta, honey, wine, ouzo, etc.).
- Familiarization of fishermen and their families with the internet (there is a very big problem with the lack of involvement and information of fishermen, participation and information on what is happening at European level, etc.) so that we can not only discuss the Greek problems in fisheries and the sea but also why not, to define European fisheries policy (which in any case promotes the strengthening of small-scale fisheries and the income of fishermen in a sustainable way ...).
- Lastly, we have young people in the profession of Fisher, decompressing the already reduced fish stocks and at the same time strengthening the income of fishermen.

# Some 'difficult' or better strains, expressions we use, and policies we apply:

We should use the following phrases, what do you say?

Sea Tourism

Tourist Fisheries, or Athletic Fishing

In the absence of Fisheries and fishing vessels manufacture schools (while we have other agricultural schools).

Exploiting the European Programs and European Fisheries Organizations ... only for the breakage of fishing vessels.

Thank you for the invitation and of course all of you for your patience and your participation.

(at your disposal for any questions, or clarification ..)
